

AMENDMENTS TO THE CLAIMS

1. (Currently amended): A terminal device for transmitting and receiving mails, comprising:

a mail receiving unit;

a judging unit to judge whether a command declaration is included in a ~~received~~ mail received by the terminal device;

a command interpreting unit to extract and interpret a specific command following the command declaration if the judgment of the judging unit is affirmative;

a creating unit to, if the specific command is interpreted as an instruction to create a list of one or more targets, ~~which are specified by the specific command~~, create[[.]] the list of the one or more targets from the targets stored in memory of the terminal device, ~~the list of the one or more targets which are being specified by the specific command~~ and including the mail received by the terminal device;

a mail transmitting unit to create and transmit a mail having the created list as a mail main body and addressed to a requestor; and

a processing unit to process the ~~received~~ mail received by the terminal device as a regular mail if the judgment of the judging unit is negative.

2. (Previously presented): The terminal device of Claim 1, further comprising:

a comparing unit to detect, if a password accompanies the command declaration and the judgment of the judging unit is affirmative, the password, and compare the password with a password owned by the terminal device; and

an authorizing unit to authorize the extraction and interpretation of the specific command if the passwords match each other.

3. (Previously presented): The terminal device of Claim 1, wherein

the command declaration is a unique character string different from a mail text, and

the specific command is a line of code including a storage location of the targets, a type of the targets, and a process to be performed.

4. (Previously presented): The terminal device of Claim 3, wherein the targets are received mails, transmitted mails, schedules of events, images, an address book, received voice calls, or transmitted voice calls.

5. (Original): The terminal device of Claim 1, wherein if a specific command transmitted by the requestor after the requestor checks the list of the mail is a request of transmitting a specific item in the list, the specific item is read from the memory, and a mail having the read specific item as a mail main body and addressed to the requestor is created and transmitted.

6. (Previously presented): The terminal device of Claim 1, wherein if a specific command transmitted by the requestor after the requestor checks the list of the mail is a request of deleting a specific item in the list, the specific item is deleted from the memory.

7. (Original): The terminal device of Claim 5, wherein a mail having a main body which indicates completion of the deletion and addressed to the requestor is created and transmitted.

8. (Cancelled)

9. (Original): The terminal device of Claim 1, wherein if the targets are schedules of events, a data, a time, and an icon indicating a type of an event are displayed in the list, with respect to each of the schedules of events.

10. (Original): The terminal device of Claim 1, wherein if the targets are images, a shooting date, a title, an address in which an image is stored are displayed in the list, with respect to each of the images.

11. (Original): The terminal device of Claim 1, being a mobile phone.

12. (Previously presented): The terminal device of Claim 2, wherein the command declaration is a unique character string different from a mail text, and the specific command is a line of code including a storage location of the targets, a type of the targets, and a process to be performed.

13. (Previously presented): The terminal device of Claim 12, wherein: the targets are received mails, transmitted mails, schedules of events, images, an address book, received voice calls, or transmitted voice calls.

14. (Previously presented): The terminal device of Claim 1, wherein the list of the one or more targets is created by selecting a predetermined number of the targets, in order of most recently received.

15. (Previously presented): The terminal device of Claim 1, wherein if the targets are the received mails, unread mails are included in the list and read mails are not included in the list.

16. (Previously presented): The terminal device of Claim 11, further comprising: a display unit to display data stored in the memory.

17. (Previously presented): The terminal device of Claim 1, wherein the number of the one or more targets in the list is a predetermined number that has been specified.

18. (Previously presented): The terminal device of Claim 1, wherein if the targets are received mails, at least a sender, a received date, and a subject are displayed in the list, with respect to each of the received mails.
